- Rudbeckia laciniata
- Salvia 'Blue Hill'
- Solidago 'Solar Cascade'

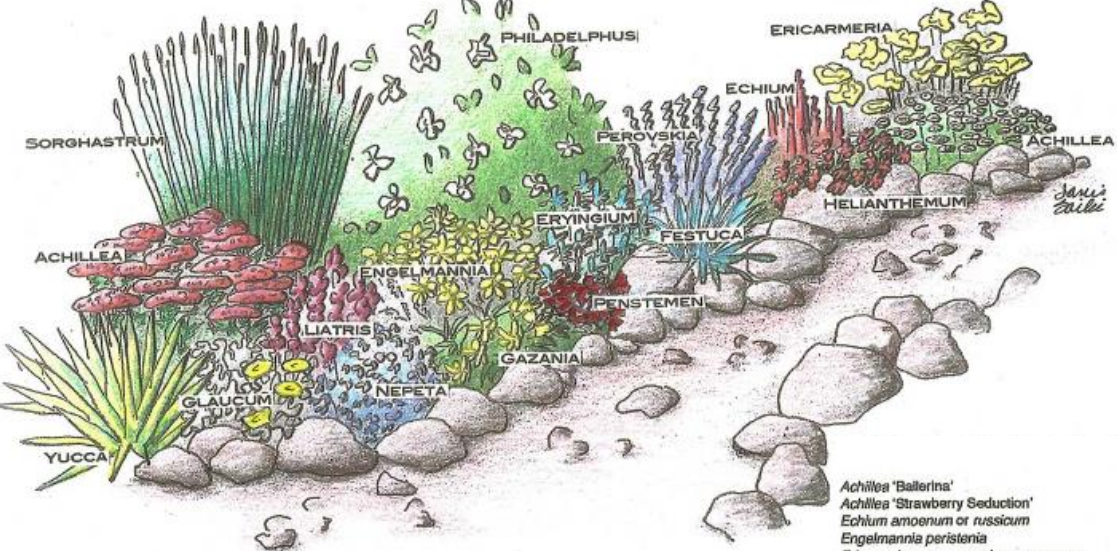

Friends of Manito Xeric, Dry Creek Bed Garden

The Friends of Manito "Garden-in-a-Box"

Xeric, Dry Creek Bed Garden

Designed by Janis Salki TFM Plant Sales Manager

Remember, plants are not drought tolerant or xeric until they have developed a good root system; 1-3 years after planting. Winter wet will be the demise of drought tolerant plants sooner than a cold -20 degrees below zero temperature. Xeric plants most often require quick draining soils.

Easy, Peasy and Spectacular!

Achillea 'Ballerina'
Achillea 'Strawberry Seduction'
Echium amoenum or russicum
Engelmannia perstenia
Ericameria nauseosa subsp. nauseosa
Eryngium 'Blue Glitter'
